A. Introduction

Corporate Social Responsibility (“CSR”) is the commitment of companies to provide resources and support activities focused on enhancing economic and social development. It is the effort made by companies to improve the living conditions of the local area in which they operate and the society at large. The activities taken up as part of corporate social responsibility reflect the intent to create a positive impact on society without seeking any commensurate monetary benefits.

CSR has been a long-standing commitment at ICICI Venture and the ICICI Group (“the Group”) and forms an integral part of its activities. The Group’s contribution to social sector development includes several pioneering interventions and is implemented through the involvement of stakeholders within the Group and the broader community. ICICI Bank Limited established the ICICI Foundation for Inclusive Growth (“ICICI Foundation”) in 2008 with a view to significantly expand the Group’s activities in the area of CSR. Over the last few years ICICI Foundation has developed significant projects in specific areas and has built capabilities for direct project implementation as opposed to extending financial support to other organisations.

ICICI Venture’s objective is to pro-actively support meaningful socio-economic development in India and enable a larger number of people to participate in and benefit from India’s economic progress. This is based on the belief that growth and development are effective only when they result in wider access to opportunities and benefit a broader section of society. ICICI Venture aims to identify critical areas of development that require investments and intervention, and which can help to realize India’s potential for growth and prosperity.
